New York's Mt. Sinai H.S. Joins Growing List of Innovators on LI

Rochester Hills, MI...CSG/SportsCoatings and **Mt. Sinai High School** today announced the school's wrestling room has been treated with an innovative and long-lasting antimicrobial system. The Wrestling Package, offered by CSG, is a comprehensive antimicrobial system that kills illness-causing microorganisms, such as Staph and MRSA, and continually inhibits a wide array of bacteria, mold and fungi on surfaces for the entire season.

"We want to give our student athletes every opportunity to succeed in an environment that is equipped with the most proactive health and safety measures," Scott Rey, Athletic Director, Mt. Sinai High School. **"Aside from our own wrestlers, I want to make sure every student athlete that visits our school is getting the best proactive measure available."**

"High schools in Long Island, have really stepped up and led the charge nationwide to be more proactive against microbial threats like bacteria," said Craig Andrews, Chief Executive Officer, CSG. "We are pleased to include Mt. Sinai High School in Long Island as another innovator in the world of high school athletics."

A recent independent study conducted by the Comprehensive Athletic Treatment Center showed that treating surfaces and fabrics with CSG antimicrobial products can significantly reduce the spread of skin ailments when used in concert with a total hygiene program. The study also revealed that SAS antimicrobial products play a key role in reducing problematic microorganisms in athletic environments.

The Wrestling Package includes two leading-edge products that are used nationwide by franchises in the NFL, NBA, MLB, and athletic departments in the Big 12, ACC, Big 10 and Mountain West. Applying the Wrestling Package is simple two-step process that begins by treating designated surfaces with SportsClean® Plus, a cleaner disinfectant formulated to work in synergy with SportsAide 1000 antimicrobial technology. This is an integral portion of the process because it effectively kills illness-causing microbial contaminants such as MRSA, staph, ring worm, and other pathogenic fungi. Even more importantly, SportsClean Plus meets the OSHA bloodborne pathogen standard for HIV, HBV, and HCE. After properly cleaning the surfaces tabbed for treatment, the unique and innovative antimicrobial power of SportsAide 1000 is applied.

Just one treatment of SportsAide 1000 will inhibit the growth of bacteria, mold, and fungi on surfaces for the entire wrestling season. The advanced antimicrobial power of SportsAide 1000 is vastly superior to any other technology nationwide for several key reasons. The water-based antimicrobial fights a wide array of microbial growth 24/7. Most importantly, SportsAide 1000 will not create adaptive organisms or "super bugs" like MRSA. Finally, it is important to note that the antimicrobial technology powering SportsAide 1000 has been proven effective through 30 years of use in high-performance settings such as surgical clean rooms.

CSG is America's leading provider of long-lasting antimicrobial products, treatments and services. CSG offers products and services for any facility. Visit www.csggrp.com or call 516.729.8241.
